# Software Development Engineer Automotive West-Flanders

## ▼ JOB DESCRIPTION

As an AKKA consultant you will be in charge of an empowering project. For one of our clients active in the automotive sector, we are integrating a Software Development Engineer in our teams.

- ▼ As Software Development Engineer you will be developing and testing low-level embedded software for transmission controllers
- ▼ You will be developing and maintaining hardware abstraction layer modules, run time environment modules and safety relevant software
- ▼ You will be writing your own documentation and test cases or scripts.
- ▼ You are responsible for the configuration and integration of software modules (AUTOSAR, OSEK, MCAL, CAN) and diagnostics protocols (J1939, OBD, UDS)

## ▼ YOUR PROFILE

- ▼ You obtained a Master's degree in Electronics or Computer Sciences.
- ▼ You have a passion for hardware and software interaction.
- ▼ You have an eye for detail, good communication skills and you work and think in a structured manner
- ▼ You have a strong interest and/or experience with automotive powertrain systems and components
- ▼ You are a team player, but also like to work autonomously
- ▼ When needed, you are open to travel internationally
- ▼ You speak fluently English

## AS AN AKKA CONSULTANT...

You will be:

- ▼ In charge of diverse transversal and empowering projects
- ▼ Supported in your career by your AKKA Manager
- ▼ Actor of your training plan and your personal and professional development
- ▼ Member of a dynamic and collaborative community of engineers
- ▼ Benefiting from a permanent contract
- ▼ Benefiting from a competitive salary packages including several extra-legal benefits.
